Catálogo de Filtros para Servicio Ligero y Servicio Pesado

AFTERMARKET

**MAHLE**  
ORIGINAL

# MAHLE ES SINONIMO DE CALIDAD

Los filtros tienen una larga trayectoria con MAHLE. Desde el principio, los hermanos Mahle, Ernst y Hermann reconocieron que tan importantes son los filtros, para la operación y la vida del motor de combustión interna. Después de todo, el proceso de combustión es tan bueno como lo sea el aire y los fluidos que están involucrados en este proceso.

MAHLE es una empresa innovadora en el desarrollo de motores de la industria automotriz. Tenemos seis complejos de investigación y desarrollo distribuidos alrededor del mundo en: Stuttgart, Northampton, Detroit, Tokio, Shangai y Sao Paulo. Nuestro enfoque único de ser un desarrollador de sistemas para motor, da una perspectiva diferente en la importancia de la filtración. Fabricamos sistemas de filtros para aire óptimos para

ajustarse a los motores y las características de los vehículos. Nuestros socios y talleres se benefician con la calidad y equipo original para todos los filtros del vehículo.

Cuando se habla de calidad, estamos hablando mas allá de la eficacia de nuestros productos. Sabemos que los filtros MAHLE Original® tienen la misma calidad que los componentes originales en todos los casos... Tenemos los certificados y los galardones para probarlo. Pero la calidad se extiende mas allá de nuestros productos, ya que también se encuentra en nuestro servicio. Tenemos información impresa, personal calificado en ventas y en servicio técnico, contamos con capacitación técnica y comercial, excelentes herramientas de soporte y lo más importante, los mejores componentes en el lugar correcto y en el momento exacto.

La información contenida en este Catálogo, ha sido recopilada y actualizada de diversas fuentes de información, además de haber sido elaborada con el mayor cuidado con el objetivo de proveer datos actualizados, no obstante, MAHLE no asume ninguna responsabilidad por errores eventuales e involuntarios, una vez que los datos indicados solo figuran como información adicional.

Las marcas de vehículos son propiedad de cada uno de sus propietarios, solo se mencionan en este Catálogo como información.

## Para asistencia técnica llame: 01-800-590-5800

**Horario: 8:30 am - 5:30 pm  
(Lunes a Viernes)**

El uso de productos MAHLE Original, Perfect Circle, Carpro, Clevite, Clemex y Victor Reinz en aeronaves u otro tipo de equipo especial, puede ser una violación de leyes locales, estatales o de la Agencia Federal de Regulaciones.

Estos productos están destinados exclusivamente para aplicaciones automotrices. Bajo ninguna circunstancia deben utilizarse en aplicaciones que no sean automotrices, incluyendo sin limitaciones motores de aeronaves, equipos médicos, aparatos de energía atómica o reactores. atomic energy devices or reactors.

Leyes Federales, estatales y locales restringen el retiro, hacer inoperante o en algunos casos la modificación de los dispositivos o sistemas de emisiones de fábrica. El estado de California restringe el uso de componentes que puedan incrementar emisiones en las unidades utilizadas en calles o carreteras públicas. La venta o instalación en vehículos de emisiones controladas de ciertos componentes no aprobados por el

California Air Resources Board, los cuales alteran o modifican el diseño o rendimiento original de los sistemas de control de emisiones esta prohibido. Algunos de los componentes indicados y ofertados para venta en este catalogo pueden encontrarse dentro de las restricciones antes descritas. Tales componentes están destinados para utilizarse en vehículos todo terreno (off-road) que participan en diferentes competencias o en otro tipo de vehículos que están exentos de las leyes aplicables para el control de emisiones. La instalación de estos componentes en vehículos sujetos a dichas leyes pueden ser prohibidos.

MAHLE recomienda revisar las leyes aplicables para el control de emisiones antes de considerar la instalación de este tipo de componentes o partes modificadas.

Si usted necesita mayor información acerca de este tipo de componentes por favor contacte a su representante MAHLE o a través de nuestra línea de asistencia técnica 01-800-590-5800.

## Aclaración

Los números de parte como equipo original contenidos en este catálogo, acerca de vehículos o motores, son únicamente para fines comparativos y de referencia. No tienen el propósito de dar un componente original y no deben ser utilizados con el dueño del vehículo.

La preparación e impresión de este catálogo tomó varios meses, por lo tanto las aplicaciones para modelos recientes pueden no estar incluidas. En algunos casos el Filtro pudo haber cambiado en diseño durante la producción en serie. En caso de tener alguna duda, por favor contacte a su representante.

Toda la información contenida en este catálogo ha sido compilada cuidadosamente; de cualquier forma, son informativos. Los cambios en números de motor y tipo, que afectan los componentes del fabricante y los tipos de Filtros están sujetos a reservas.

Tras la publicación del catálogo, todas las ediciones anteriores dejarán de ser válidas. Derechos de Autor reservados. Prohibida su reproducción o extractos sin la autorización correspondiente por escrito. Se tomarán acciones por un mal uso.

# Filtros MAHLE Original®

Los Filtros tienen una larga tradición con nosotros. MAHLE – un histórico desarrollador de componentes para motor – ha reconocido a tiempo que tan importante es el funcionamiento óptimo de los filtros en las diferentes circulaciones del motor. Después de todo, cada combustión es tan buena como sus filtros, sin importar si el aceite, combustible o el aire de admisión tiene que ser limpiado. Y porque las personas se mantienen sanas cuando respiran aire limpio, los filtros de habitáculo son una parte importante de nuestro programa.

MAHLE cuenta con un amplio programa de filtros para autos de pasajeros, vehículos comerciales, agrícolas y maquinaria de construcción, así como motocicletas. Como un socio desarrollador e innovador de la industria automotriz con instalaciones para Investigación y Desarrollo en Stuttgart, Northampton, Detroit (Farmington Hills y Novi), Tokyo (Kawagoe, Okegawa), Shanghai y

São Paulo (Jundiaí), fabricamos filtros y sistemas de filtración que están especialmente adaptados a las características del motor, condiciones de ensamble y aplicaciones. Nuestros socios comerciales y los talleres se benefician de esto, obteniendo filtros con calidad de equipo original para aceite, aire, combustible, cartuchos, módulos de carbón activado, secadores de aire, separadores de aceite, filtros hidráulicos y filtros para cabina, que también pueden ser adaptados a ciertos vehículos.

# Filtros para Aceite (OX / OC)

### Filtros para Aceite

Los Filtros para Aceite MAHLE Original evitan que las partículas de suciedad ingresen en el sistema de lubricación, manteniendo la calidad del aceite, así como el rendimiento y eficiencia del motor. Gracias a su plegado geométrico estable, la estabilidad en los arranques en frío esta asegurada.

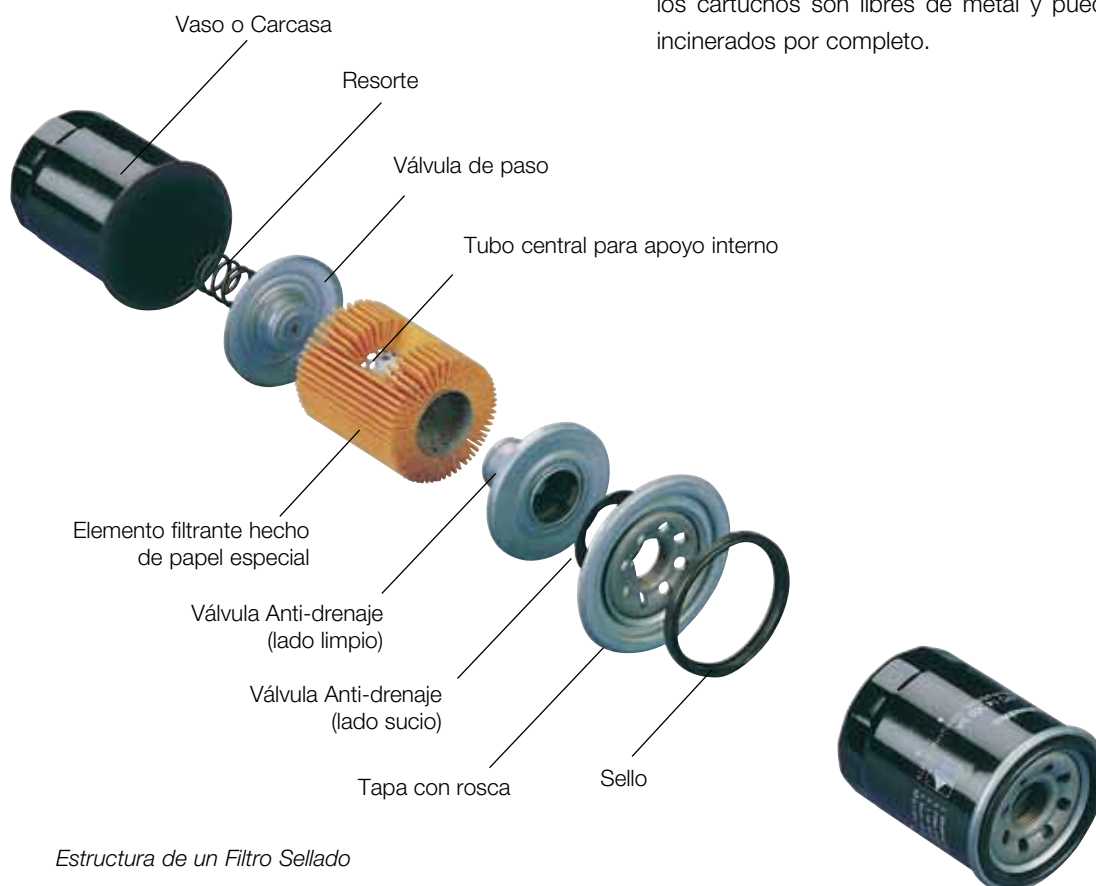

el aceite muy viscoso que se encuentra en un arranque en frío o por los elementos filtrantes demasiado contaminados, cuando los intervalos de reemplazo han sido excedidos. Una válvula anti-drenaje impide que el filtro de vacíe cuando el motor esta apagado, asegurando el suministro de lubricante de forma inmediata cuando se arranca el motor.

### Filtros Sellados para Aceite (spin-on) (OC)

Picos de presión superiores a 290 psi son compensados gracias a la resistencia del vaso. Una válvula de alivio garantiza el suministro del lubricante bajo cualquier condición – ya sea por

### Cartuchos de Filtros para Aceite (OX)

Con los cartuchos para filtros de los programas OX y OX-Eco ofrecemos particularmente soluciones económicas para talleres: en lugar de reemplazar el filtro completo, solo el elemento filtrante tiene que ser reemplazado. En la versión OX-Eco, los cartuchos son libres de metal y pueden ser incinerados por completo.

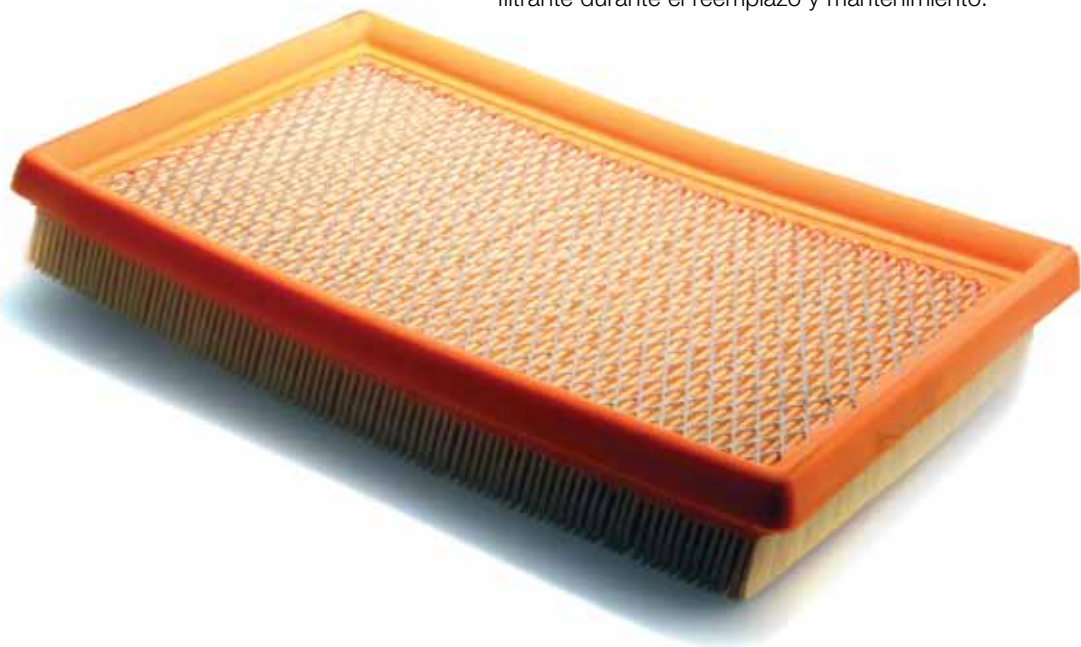

# Filtros para Aire (LX)

### Filtros para Aire (LX)

La limpieza del aire aspirado es una de las condiciones más importantes para una adecuada potencia del motor, torque alto, bajo consumo de combustible y emisiones contaminantes mínimas. Con los Filtros MAHLE Original se podrá retener más del 99.9% de polvo, hollín y partículas de desgaste de neumáticos, al mismo tiempo, una mezcla adecuada de aire-combustible es asegurada. La capacidad de retención de partículas asegura una larga vida útil bajo condiciones extremas como altas o bajas temperaturas además de influencias químicas. La calidad de nuestros filtros evitan el desgaste prematuro en válvulas, superficies de trabajo en cilindros, anillos para pistón, cojinetes y otros componentes del motor. Para garantizar la duración y el rendimiento adecuado, todos los filtros deben ser reemplazados dentro de los intervalos estipulados por el fabricante del auto.

En el sector de autos para pasajeros, los elementos están colocados en carcazas montadas sobre el chasis y se estabilizan con sellos suaves o adhesivo en la parte de contacto con polvo y con rejillas de soporte para el otro lado, dependiendo de las especificaciones del fabricante del auto. Para las áreas ricas en polvo o impurezas, se coloca una espuma pre-filtrante por el lado de filtración. Para las áreas de mayor carga, soportes de plástico o metal son utilizados.

Para vehículos comerciales, sistemas de filtración robustos y al mismo tiempo ligeros fabricados con plástico reciclable son utilizados para poder reducir el ruido del aire de admisión. Con el fin de lograr una alta estabilidad de la superficie de filtración, los filtros son regularmente cilíndricos. Para mejorar la eficiencia, sellos radiales y soportes axiales son utilizados. Insertos de seguridad adicionales en forma de cilindros de fieltro especial protegen el lado limpio del elemento filtrante durante el reemplazo y mantenimiento.

# Filtros para Combustible (KC / KL / KX)

### Filtros para Combustible

Los conceptos de inyección de combustible modernos requieren de un suministro homogéneo, libre de pulsaciones y con una extrema limpieza. Sin embargo, las partículas extrañas pueden ingresar al sistema durante el proceso de producción o transporte y necesitan ser filtrados. Los filtros para combustible de MAHLE Original, retienen de manera efectiva este tipo de partículas. Gracias al papel filtrante de alta calidad, el sistema de combustible es protegido de pequeñas partículas de polvo y por lo tanto de daños por corrosión. Esto protege la función del motor y asegura la operación eficiente del vehículo. La constante alimentación de combustible requerida se consigue con la regulación de presión y la recirculación del propio combustible sobrante desde la bomba y hacia el tanque, compensando o amortiguando las pulsaciones originadas por las variaciones en la presión del sistema de combustible. Nuestros filtros para combustible cumplen con los altos estándares de calidad de los fabricantes de autos y aseguran un sellado hermético en caso de accidentes.

Sin embargo, una condición importante para el correcto funcionamiento del filtro para combustible es el reemplazo dentro de los intervalos estipulados por el fabricante del auto.

### Filtros para Combustible en Línea (KL)

Los filtros en línea, están montados en la misma línea de combustible como su nombre lo dice. Son fabricados con diferentes materiales como hojas de acero protegidas contra la corrosión, acero inoxidable, aluminio o plástico. Las funciones opcionales como una regulación de presión, precalentamiento, enfriamiento y separadores de agua están disponibles.

### Cartuchos (KX) y Filtros Sellados (KC)

Los filtros sellados están diseñados para un fácil y rápido reemplazo. Dependiendo de su tipo, son suministrados con una línea para conectar un tapón para drenaje de agua o un sensor para el nivel de agua. Para los elementos filtrantes reemplazables solo el cartucho es reemplazado. Esos elementos filtrantes también están disponibles en versiones que pueden ser incinerados por completo aliviando la presión sobre el medio ambiente.

# Filtros para Cabina (LA / LAK)

### Filtros para Cabina (LA)

Los filtros para cabina hacen un trabajo limpio. Durante un viaje con una hora de duración, un volumen de 100,000 litros de aire ha ingresado al interior del vehículo. Lo más importante es el cambio del filtro de manera regular. MAHLE recomienda el cambio del filtro para cabina cada 15,000 km – o al menos una vez al año. Esto debido a que si el filtro para cabina falla o se obstruye, la concentración de contaminantes en el interior del vehículo puede incrementarse hasta seis veces en comparación con el aire exterior. Los filtros para cabina de MAHLE Original, proporcionan al conductor y pasajeros aire limpio para respirar, protegen su salud y bienestar, además del poder de concentración del conductor, incluso en los casos de una alta concentración de polen o contaminación. También reducen la carga en el ventilador, protegen de la contaminación a los sistemas de calefacción y climatización, mejoran la circulación del aire y evitan el peligroso empañamiento de cristales. De igual forma, el interior de los cristales y accesorios permanecen limpios por más tiempo.

La geometría del plegado de nuestros filtros para cabina esta diseñado para proporcionar una larga vida útil. La baja resistencia al flujo minimiza la carga en los ventiladores. Gracias al ajuste preciso del elemento filtrante a su alojamiento, no existe aire sin filtrar.

Nuestros filtros para cabina no producen emisiones nocivas, métodos libres de solventes son utilizados para su producción, tales como tecnologías de soldadura por ultrasonido.

### Filtros para Cabina con Carbón Activado (LAK)

Los filtros para cabina con elementos de carbón activado retienen los tan nocivos gases de escape y polvo, así como altas concentraciones de ozono y olores desagradables. Su elemento filtrante plisado, consta de tres capas: una capa de carbón activado se intercala entre dos capas de lana. Las capas del filtro se fusionan por medios en donde pegamentos o solventes no son utilizados del todo.

Dependiendo del tipo de vehículo, los filtros de carbón activado están disponibles y pueden ser usados en lugar de los filtros de cabina convencionales.

## Herramientas Especiales

Cuando reemplace un filtro, el contar con el filtro correcto con la calidad adecuada no es lo único importante, sino también el tener los procedimientos efectivos de desmontaje y montaje. Para este propósito nuestro programa incluye cuatro herramientas, las cuales pueden ser utilizadas para una rápido y sencillo montaje y desmontaje de filtros para aceite sellados (OC) y algunos elementos filtrantes para aceite (OX).

# FABRICACIÓN A NIVEL MUNDIAL

**MAHLE tiene fabricas en todo el mundo...** Las numerosas aplicaciones, requieren para una optima eficiencia en filtración y un complejo rango de productos. Considerando el amplio número de vehículos, desde ligeros hasta pesado, y desde los nacionales hasta los de importación; un fabricante que hace su propia distribución necesita extenderse a todos los lugares en el mundo. Esa es la razón por la que MAHLE tiene una red de fabricas de filtros en los cinco continentes dando servicio tanto a las necesidades de equipo original como a las de Aftermarket alrededor del mundo. Todos los filtros MAHLE Original® tienen una cosa en común, son altamente eficientes protegiendo a las personas, a los motores y al medio ambiente. Nuestro programa de filtros involucra constantemente productos innovadores con una alta demanda. Esta superioridad técnica es validada por la gran lista de nombres que confían en MAHLE para satisfacer su necesidad de filtros.

## **Las mejores referencias a nivel mundial – Estos clientes de equipo original confían en MAHLE.**

Alfa Romeo, Audi, BMW, Case New Holland, Caterpillar, Citroën, Cummins, Daewoo, DAF, Deutz, Ducati, Ferrari, Fiat, Ford, General Motors, Harley Davidson, Hatz, Honda, Hyundai, Isuzu, Iveco, Jaguar, John Deere, Komatsu, Lancia, Land Rover, Mack, Magna Steyr, MAN, Maserati, Mazda, Mercedes-Benz, Mitsubishi, Moto Guzzi, MWM, Nissan, Perkins, Peugeot, Porsche, Renault, RVI, Saab, Scania, Seat, Skoda, Smart, Steyr Daimler Puch, Stihl, Suzuki, Toyota, Volkswagen, Volvo, Zettelmeyer.
